

# CPSA Certified Professional for Software Architecture®

The international Software Architecture Qualification Board ([iSAQB](#)) defines curricula on several levels for software architects. You can find download links in the following sections.

The **Foundation Level** curriculum is currently maintained and published in both English (EN) and German (DE). Maintainers from the Foundation-Level-Working-Group and voluntary reviewers collaborate on [Github](#) to improve the curriculum.

A **glossary** of the terminology used in the iSAQB curricula can be found as a (freely available) ebook, published on [Leanpub](#)
